

## CLINICAL VIEWER

The new way HealthShare Referral Manager (HSRM) is making information sharing easy and convenient

Clinical Viewer is a module available within HSRM that allows VA staff and community providers to access a clinical summary of each Veteran's history, including details such as:

- diagnoses
- prior medical procedures
- medications
- lab results
- immunizations
- allergies

**Community providers' insight into Veteran medical history is more robust than ever before!**

These details will be automatically synced to any HSRM referral a Veteran has, so information is readily available for viewing

The screenshot displays the Clinical Viewer interface. On the left is a sidebar with a 'Chartbook' section containing links to Clinical Summary, Conditions, Allergies, Medications, Documents, Immunizations, Vital Signs, Lab Results, Diagnostic Studies, Procedures, Histories, Encounters, Appointments, Care Team, Cohorts, Claims, Demographics, and Insurance. The main content area has a top navigation bar with 'Back to: Referral List' and 'HSRM - UAT - MR8'. Below this, there are six tabs: Diagnoses, Allergies, Medications, Lab Results, Diagnostic Studies, and Documents. The 'Diagnoses' tab is active, showing a table with columns for Diagnosis, Type, and Last Updated. The 'Allergies' tab shows a table with columns for Allergen, Reaction, Source, Category, and Last Updated. The 'Medications' tab shows a table with columns for Medication, Dose, Start Date, and Details. The 'Lab Results' tab shows a table with columns for Order, Results, Collection Date, and Details. The 'Diagnostic Studies' tab shows a table with columns for Study, Ordering Clinician, Order Date, Test Date, and Status. The 'Documents' tab shows a table with columns for Document, Source, Facility, Event Date, and Details.

| Diagnosis                | Type      | Last Updated     |
|--------------------------|-----------|------------------|
| PROPHY VACC. STREP PNEU  | PRIMARY   | 01/20/2012 09:15 |
| VACCINATION FOR DTP-DTAP | SECONDARY | 01/20/2012 09:15 |
